

A complete illumination system designed for the  
**Ocular Oncologist** for use in the clinic or operating room!

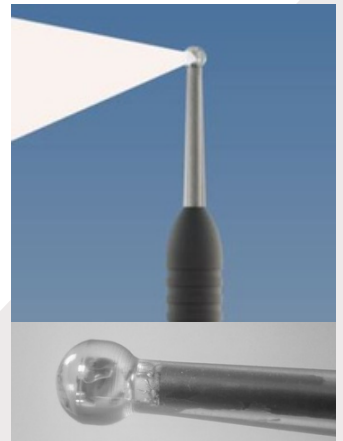

## BEACON LIGHT SOURCE

- 50 watt LED Light Source
- Customized illumination pathway to maximize output and usable light
- Low profile and portable unit for use in the clinic or operating room

## BEACON TRANSILLUMINATOR

- A conventional ball-point depressor tip with a “Side Fire Illumination” feature allows for a better view, less glare and improved surgeon ergonomics
- The device is designed to offer the surgeon the ability to simultaneously perform unassisted scleral depression while performing oncology evaluations

## BEACON PUPILLARY ILLUMINATOR

- Provides illumination through the pupil for superior identification and marking of choroidal tumors
- Helps identify Vortex veins and other structures during buckling
